Office Action Summary

Art Unit: 2872

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 33-52, drawn to a multi-mirror system arranged to form an arc-shaped image field with a predetermined edge sharpness.

Group II, claim(s) 53-65, drawn to a multi-mirror system arranged to form an arc-shaped image field comprising a normal incidence mirror and a field forming component.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: it appears any special technical features of the above mentioned inventions relate to the separate features of the particular inventions, absent an allowable linking claim to the above mentioned inventions. As to the inventions listed as Groups I and II, Groups [II] and [I] are related as combination and subcombination, respectively, and lack unity due to the fact that the combination as claimed does not require the particulars of the subcombination because of the omission of the predetermined edge sharpness details. Therefore, it appears that if any special technical feature is present it must reside in the separate features of the subcombination.

Art Unit: 2872

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

- A). The species depicted by Fig. 8;
- B). The species depicted by Fig. 9;
- C). The species depicted by Fig. 10;
- D). The species depicted by Fig. 11;
- E). The species depicted by Fig. 12;
- F). The species depicted by Fig. 13;
- G). The species depicted by Fig. 14; and
- H). The species depicted by Fig. 15.

Applicant is required, in reply to this action, to elect a single species consistent with the elected Group to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations

Art Unit: 2872

of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: it appears any special technical features of the above mentioned species relate to the separate features of the particular species, absent an allowable linking claim to the above mentioned species.

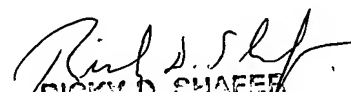

5 Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to R.D. Shafer whose telephone number is (703) 308-4813.
